The Project

Liberation Vapors

For this project I decided to go with the theme of creating a fictional company named Liberation Vapors. The reason I decided to go with this theme is because I am part of the vaping community. Where I used to live back in New York does not have a lot of shops that cater to the vaping community. I had recently took a trip back to my old residence and saw how big the vaping trend was in the town, but the lack of shops made it difficult for people to continue. While everything can be ordered online, sometimes it is nice to have someone there to teach you different techniques like coil building and more. My friend, whom I had asked permission to use in this site, had just started making his own E-Liquids and we got to thinking about maybe one day going into business together. We shot around ideas and creating a possible hometown shop was one of them. I decided to use these ideas when it came time to work on my project. I think this could possibly be a step towards our goal in realizing that this company may be a possibility one day.

The lists below are images that were provided by my friend Kevin

- Bottle.jpg
- Atty1.jpg
- Kev.jpg
- Lemo drop. Jpg
- Mod1.jpg
- Mod2.jpg
- Vapepipe.jpg

I also created thumbnail versions of these images for the website with his permission which is listed below from my email.

to me

I, Kevin Lindsley, give Kyle Szymanski permission to use these pictures and edit them if necessary.

I provided the following images via my cellphone camera and created thumbnail versions of them:

- Ky.png
- Paul reverie.jpg

- Proclamation.jpg
- -eleaf.jpg

The following images I received via Flickr under Creative Commons license: links to the images will be linked under the creative commons. None of these images were altered in any way. There are size variations, but were taken from their page.

The next section will explain where all of the requirements are for this project.

- Homepage – index.html
- The use of two jQuery effects
 - Toggle – Located in index.html under div class, welcomeMessage and the code is located under main.js
 - Show- Located in gallery.html located under the div class, theDiv and the code is located under main.js
- Modernizr is located in the window.js file and checks for video. In which there are two videos located inside of this project.
- Interactive Data Visualization is located under the contact.html file under the tabs div. it can be found under the div tabs-3 enclosed with a canvas tag.
- A interactive map is also located under the tabs div, under tabs-2 on contact.html
- Html 5 Video can be found in two places. On the index.html page under the div welcome. The second video can be found under the div tag of theDiv located on the gallery.html page. In order to view the second video you must press the show button, as it is part of the jQuery effects.
- The image gallery is located on the gallery.html page under the id tag of gallery. This is located in the beginning of the page.

I hope to continue my learning and improve this site more as I am able to learn more about design and development.

Thank You.
